IG ECOCOAT™
PAINTED BLACK FINISH

Introduction

IG EcoCoat™ is the cost efficient and ecofriendly solution. We use a specially formulated paint that is water reducible with a Gloss Black Enamel Finish. It is designed with a special chemical and corrosion resistant pigments, that combined with a special chain stop resin, allow for excellent adhesion. The grating is dipped in one coat of our specially produced gloss black paint. This coating is designed to dry fast and performs well with a dipped application. We can accommodate pieces up to 4' x 30'.

Painted in house, this process can help reduce lead time, provide cost savings when compared to other painted applications, and is a great option to provide a protective coating.

Why choose a painted finish???

- ✓ Quick Lead Time
- ✓ Eco- Friendly option
- ✓ Cost Savings
- ✓ Protective Gloss Finish
